                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Matches
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            This sequence encodes an epitope-tagged TATA-box binding protein (TBP) that is expressed by the transgenic non-human animals of the invention. The animals are used to produce TBP. TBP is used to isolate and characterise higher-order transcription complexes (from different tissue and cell types, optionally at different developmental stages). It is also used to identify new and/or specific TBP associated factors (TATS, e.g. transcription factors, activators or inhibitors) and TAF-interaction factors, and to raise antibodies against TBP. The TATS may be useful for regulating gene expression, e.g. disease-related genes, so are potential pharmaceuticals, also for identifying human analogues for use in drug screening. The antibodies are used for affinity purification of TBP and its complexes. TBP can isolate transcription complexes from a wide variety of different tissues and cells (contrast known methods that are limited to isolation from a particular cell type).

XX Transgenic animal expressing epitope-tagged TATA-box binding protein PT for isolating higher-order transcription complexes and specific PT factors that associate with the protein, useful as potential PT factors that associate with the protein, useful as potential PT therapeutic agents

XX Claim 2; Page 27-29; 38pp; English.

XX This sequence encodes an epitope-tagged TATA-box binding protein (TBP) CC that is expressed by the transgenic non-human animals of the invention. CC The animals are used to produce TBP TBP is used to isolate and CC characterise higher-order transcription complexes (from different tissue animals are used to produce TBP TBP is provided to isolate and CC characterise higher-order transcription complexes (from different tissue and cell types, optionally at different developmental stages). It is also cc used to identify new and/or specific TBP associated factors (TAPS, CC e.g. transcription factors, activators or inhibitors) and TAF-interaction cregulating gene expression, e.g. disease-related genes, so are potential pharmaceuticals, also for identifying human analogues for use in drug coreening. The antibodies are used for affinity purification of TBP and CC variety of different tissues and cells (contrast known methods that are CC limited to isolation from a particular cell type).

                                                                                                                                                                                                                                            Sequence 20, Application US/09041886
Patent NO. 6235872
GENERAL INFORMATION:
APPLICANT: Bredesen, Dale E.
APPLICANT: Rabizadeh, Sharroz
TITLE OF INVENTION: Proapoptotic Peptides, Dependence
TITLE OF INVENTION: Polypeptides and Methods of Use
UMMBER OF SEQUENCES: 72
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            B
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Вþ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          US-09-234-332-4
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              US-09-041-886-22
                                                                                                                                                                                                                                                                                                                                                                                                                  US-09-041-886-20
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             ; Sequence 4, Application US/09234332A
